BEGINNING MADE ON BELT ROAD

Draughtsmen began work this morning in the office of City and County Engineer Gere, consulting engineer for the Oahu Belt Road Commission, on outlined plans for the proposed new roads necessary to complete the island belt road system for which was appropriated the sum of two hundred thousand dollars by the last legislature.

Two additional draughtsmen and office assistants have been put to work on the job.

It is the intention of the City and County engineer to have plans, specifications and all data at hand for perusal of local contractors within three weeks to a month's time.

The new roads will all be built by contract. The first section that is now being laid out and planned calls for five miles of new highway and is known as the Kahala section. Engineer Gere and his staff have about completed the necessary field work on this portion of the system.

When everything is ready tenders will be invited from contracting firms for performing the work.

A Saving Principle

100 PER CENT BETTER CIGAR VALUE FOR YOU.

Were we to make our cigars in Cuba, we'd have to double the present prices to meet the duty. So we have part of our establishment in Cuba and part in Tampa, where Cuba's climate prevails.

Our experts, on the ground, get the pick of the choicest Havana leaves grown.

These we mellow into rare aromatic flavor on native soil in our own warehouses.

Then, in Tampa, the final touch of Havana perfection is given in the deft handiwork of skilled Cuban cigar-makers.

Thus we lose nothing of the imported's perfection, while we save the import duty.

And this saving goes into the cigar—goes to the SMOKER instead of the government—a principle to which is due the superb quality, the unrivaled values of
